Introduction to WhatsApp Business API

The WhatsApp Business API lets medium and large businesses connect and communicate at scale.

Built for automation, integration, and reliable conversations.

More powerful and flexible than the WhatsApp Business app.

Key Features and Benefits

Automated messaging
and notifications

Rich media support: images,
documents, videos

Secure and reliable end-
to-end encryption

Integration with CRM
and business tools

Use Cases and Examples

Customer support automation

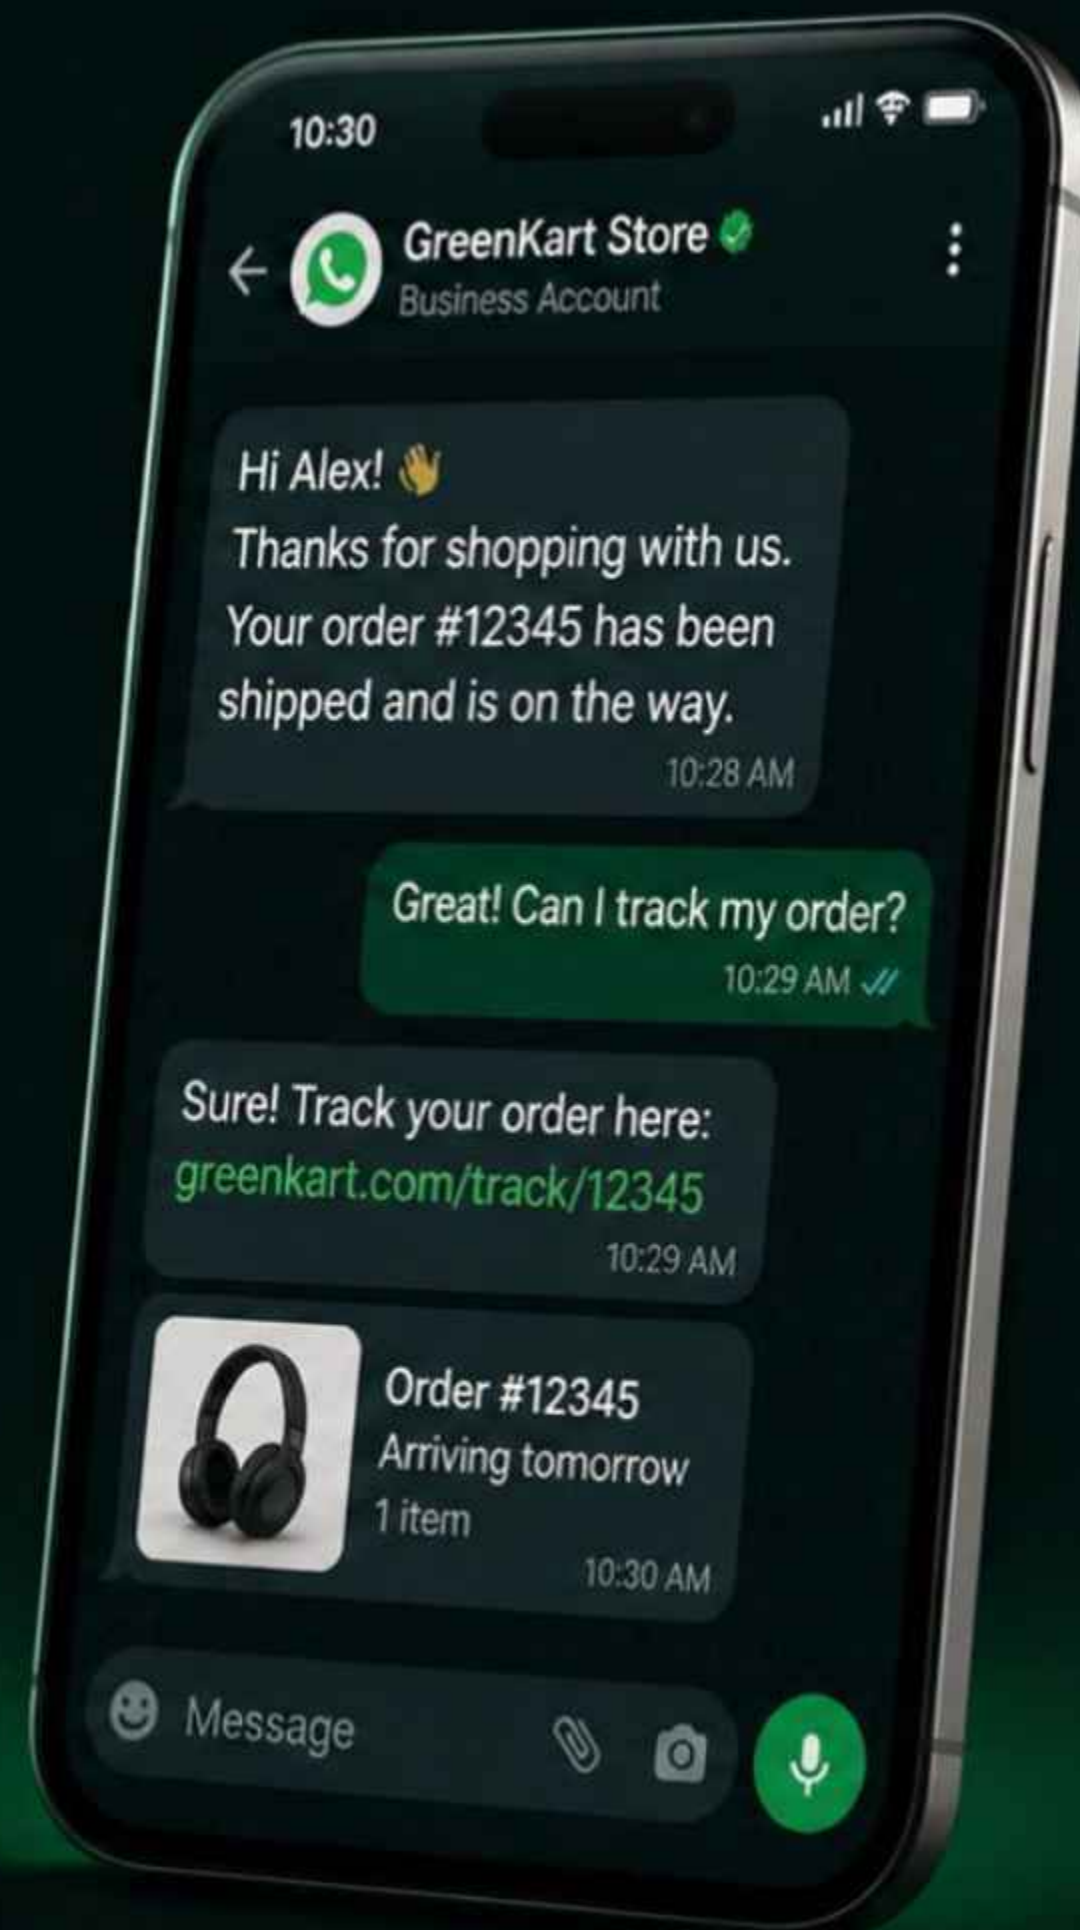

Respond faster and resolve more conversations with less effort.

Transactional notifications

Send order updates, booking confirmations, and important alerts instantly.

Marketing and promotions

Engage at scale with personalized offers and relevant recommendations.
